

Internship Daily Diary

Python with Data Science and AI

Name of the Student : Soham Prashant Patole

Name of the Mentor (Faculty) : Dipali Sapkal Ma'am

Enrollment Number : 24110220434

Semester : IF-5K

Academic Year : 2026-27

Industry / Organization : Fintech Simplified

Internship Duration : 12 Weeks (May 2026 - August 2026)

Week	Day & Date	Discussion Topics / Activity	Details of work allotted till next session/Corrections suggested/Faculty remarks	Signature of Industry Mentor
Week 01	Mon,25-05-2026	1. Introduction to all modules. 2. Intro for creating linkedin profile. 3. What is Python. 4. Applications of Python in data science.	Creation of linkedin profile. 1. Post gmeet ss. 2. Upload offer letter 3. Prepared notestand attempted provided quiz.	
	Tue,26-05-2026	Practice on : 1. What is python, its application in data science. 2. Learned about the stages in data science.	Completed given exercises and prepared notes for better understanding.	

	Wed,27-05-2026	1. Learned about modules, comments. 2. Learned the stages of data science in detail.	1. Installed VS code. 2. List all Machine Learning algorithm. 3. Practiced some programs in python.	
	Thu,28-05-2026	Practicing by doing some python programs.	Completed given exercises	
	Fri, 29-05-2026	1. Python syntax basics, common data types. 2. Performed various string functions and list functions. 3. Performed programs by using operators.	Completed given tasks: 1. Wap to reverse string. 2. Wap counting substring. 3. Wap converting lowercase to upper case and vice versa 4. Slicing of string.	
	Sat ,30-05-2026	Doubt solving lecture on python.	Completed given exercise.	
	Mon,01-06-2026	1. Learned about Tuples and its various methods. 2. Learned about Dictionary.	Completed the tasks 1. Completed the given exercise like creation of dictionaries and tuples. 2. Completed given tasks.	

Week 02	Tue, 02-06-2026	Practice on functions of List, Tuples, Dictionaries.	Tasks done such as creation of tuples, dictionaries etc.	
	Wed, 03-06-2026	- Loops and Conditional statements- for, while. - Learned about break and continue with program example.	Performed all the tasks: - Wap to check the prime no. - Wap to count number of vowels in strings.	
	Thu, 04-06-2026	Practice on: - Loops statements. - Conditional statements. - Break and continue and statements.	Performed exercise such as: - Printing multiplication table. - Fibonacci series.	
	Fri, 05-06-2026	- Learned about functions and types. - Recursion.	Series and factorial of numbers.	
	Sat, 06-06-2026	Conducted doubt solving session on list, tuples and dictionaries.	Revision of each topic done.	
Week 03	Mon, 08-06-2026	- Types of files. - Operations on file read, write, append etc. - Functions on file. - Exception Handling.	Exercise such as to perform multiple file operations and functions.	
	Tue, 09-06-2026	Revision of file and its operations.	Completed given exercise and tasks.	
	Wed, 10-06-2026	Revision on core python.	Practice on some eg.	

	Thu,11-06-2026	Practice on list, tuple and dictionaries.	Completed the assigned tasks.	
	Fri, 12-06-2026	1. Sets and various functions of it such as add, remove, discard, remove, clear. 2. Sets operations such as union, intersection and difference.	Completion of all the assigned tasks.	
	Sat,13-06-2026	Revisions on sets and its functions.	Preparing notes and completing tasks.	
Week 04	Mon,15-06-2026	Revision on loops	Practicing the programs on loops	
	Tue, 16-06-2026	Revision on tuples and list.	Practicing Programs on list and tuples.	
	Wed,17-06-2026	1. Numpy 2. Array and its types. 3. Learned about zeroes, Ones, Random, full 4. Vector, Matrix, Tensor 5. Properties of array 6. Array Shaping such as Flatten, transpose, ravel, Revision on array.	Did task on Student Result Management System and perform various operation using numpy.	
	Thu, 18-06-2026	Revision on Array.	Completed the task and practiced programs.	
	Fri, 19-06-2026	Array Slicing like Negative, Basic, Double	Practicing the Programs on array	

	Sat, 20-06-2026	1. Sorting of array. 2. Filtering of Array. 3. Concatenation of Array. 4. Fancy Indexing. 5. Revision on various functions on array.	Completed the assigned tasks...and practiced programs.	
Week 05	Mon,22-06-2026	1. Learned about data analyzing on small datasets example ecommerce sales analytics.	Practiced visual analytics and completed the assigned tasks.	
	Tue, 23-06-2026	1. Learned about Pandas, DataFrame, Series. 2. Performed various operation like printing, merging, Drop, Concatenation etc.	Revision on learned topics.	
	Wed,24-06-2026	1. Learned about printing of missing values by function. 2. Lambda 3. Kaggle dataset and did operation on them.	Revision on learned topics.	
	Thu, 25-06-2026	Practice on dictionaries.	Creating diary in the form of dictionary.	
	Fri, 26-06-2026	Conducted the doubt solving session	Look for datasets of the project.	
	Sat, 27-06-2026	Mini project allocation.	Working on expense tracker mini project.	

Week 06	Mon,29-06-2026	Completion of mini project.	Revision of the topic that are taught in previous sessions.	
	Tue, 30-06-2026	1. Installation and setup of anaconda and jupyter lab. 2. Learned about creation of environment variables.	Executed small programs and understood the working of Jupyter notebook and anacondas.	
	Wed,01-07-2026	1. Learned about importing of json file and printing of it. 2. Data Cleaning like removing duplicates and missing values.	Worked on small datasets for practice as a task.	
	Thu, 02-07-2026	Revision on core python like various operators, length, Conditioning statements if else loop functions with multiple arguments	Completed the given tasks. Also practiced on core python.	
	Fri, 03-07-2026	Revision on list, tuple, sets functions etc.	Practiced on learned topics.	
	Sat, 04-07-2026	Revision on numpy , arrays, arrays types like full, zeroes etc.	Practiced on learned topics.	

Week 07	Mon,06-07-2026	Learned about data visualization- Matplotlib its labels, changed style.	Completed the tasks such as comparison between scores and cricketers.	
	Tue, 07-07-2026	Revision on data visualization.	Practiced the graphs using matplotlib charts functions.	
	Wed,08-07-2026	Learned about bar plot, pie chart, creating repositories on github.	Performed side by side bar chart. Also created pie charts and histograms. Plotted cumulative sales of 3 products by stack plot.	
	Thu, 09-07-2026	Practice on data visualization.	Completed the tasks.	
	Fri, 10-07-2026	Learned about scatter plot. Box plot, sub plot, revision of each plot.	50 randoms points, visualize the box plot for e commerce sales analytics.	
	Sat, 11-07-2026	1. Histograms. 2. Learned about data visualization. 3. Data collections using the web scrapping, databases etc.	Created the Histograms with custom bins. Used seaborn for data visualization.	
	Mon,13-07-2026	1. HTML Basics. 2. Web scrapping.	Scrapped all products	

Week 08			names and prices from books to scrap websites.	
	Tue, 14-07-2026	Practice on web scrapping.	Scrapped current weather descriptions and temperature too. Represented in the tabular format too.	
	Wed, 15-07-2026	Practice on web scrapping.	Scrapped real python fake jobs. Saved result in CSV files. And properly parsed the HTML.	
	Thu, 16-07-2026	1. Introduction to databases. 2. Installation of MySql workbench. 3. SQL basics.	Create the database Students and inserted the data that is required.	
	Fri, 17-07-2026	1. Executed many sql queries such as Create, Update, Delete, insert, Drop, Select, etc. 2. Data Filtering.	Created the database Student and inserted the required data into the table and also performed each queries like altering, describing, dropping etc.	
	Sat, 18-07-2026	Revision on SQL queries.	Created the Sample database and performed the queries on them for revision.	
	Mon, 20-07-2026	1. Executed is null, is not null, between. 2. Learned order by	Completed the given tasks.	

Week 09		where clauses. 3. Advance SQL.		
	Tue, 21-07-2026	Practice on sql queries.	Executed the sql commands and revised.	
	Wed, 22-07-2026	1. Learned about constraints. 2. Primary key, foreign key 3. Joins- outer, inner, left, right, cross.	Created the sample database and executed all related queries.	
	Thu, 23-07-2026	1. Executed union. 2. Performed various functions like – upper, concat, length, min, max, count. 3. Creation of view, index and procedures.	Practice on learned topics.	
	Fri, 24-07-2026	1. Introduction to machine learning. 2. Common libraries such as scikit learn, Tensorflow, Pandas, Numpy.	Go through the notes related to the machine learning.	
	Sat, 25-07-2026	1. Introduction to SKlearn 2. Learned about 8 machine learning problem solving steps. 3. Practice on smatphone data from Kaggle.	Did practice on Kaggle datasets as a task.	

		4. Work on iris datasets		
Week 10	Mon,27-07-2026	1. Worked on real world problems with SKlearn using random forest classifier. 2. Practice on housing data. 3. Learned how to calculate the accuracy.	Revision on taught topics and completed the given tasks.	
	Tue,28-07-2026	1. Learned about shuffle and split algorithm. 2. Analyzing the data	Prepared notes and revised the topics.	
	Wed,29-07-2026	Training and testing on model performance.	Practice on sample datasets.	
	Thu,30-07-2026	Introduction to regression and classification models.	Revision.	
	Fri,31-07-2026	Evaluation and practice on linear regression.	Prepared notes.	
	Sat,01-08-2026	Evaluation and practice on logistics regression.	Completed the given tasks.	
	Mon,03-08-2026	Choosing the datasets for the project.	Completed the given tasks.	
	Tue,04-08-2026	Developing and evaluating the content based on recommendation model.	Completed the given tasks.	

Week 11	Wed,05-08-2026	Group discussion on AI POWERED Household Management System.	Completed the given tasks.	
	Thu,06-08-2026	Data cleaning and preprocessing.	Completed the given tasks.	
	Fri,07-08-2026	Working on project.	Discuss on project.	
	Sat,08-08-2026	Comprehensive exploratory data analysis (EDA) to understand the key data characteristics.	Completed the assigned tasks.	
Week 12	Mon,10-08-2026	Developing the models.	Completed the all activity related to project.	
	Tue,11-08-2026	building the contents and modules of models.	Completing all activity related to project.	
	Wed,12-08-2026	Implemented the cosine similarity algorithm and tested each functions.	Completed all activity related to project.	
	Thu,13-08-2026	Saved the trained models for deployment and prepared the backend for web integration.	Completed all activity related to project.	
	Fri,14-08-2026	Setup the fundamental web application structure using CSS.	Completed all activity related to projects.	
	Sat,15-08-2026	Testing each modules and finalizing the UI/UX of project.	Completed all activity related to project.
